

# TEST CASES

**Candidate:** Bruno Braga Medeiros

**Date:** 28/12/2021

**Application Under Test:** Deel (<https://app.deel.training/signup>)

Below are the test cases created for the fields First name, Timezone, and Phone number.

Each test has a unique ID and specific steps. Instead of adding a line to the table to each one of the input data, I grouped all the data when the steps are the same and the only change is on the input data.

Example: the first test (First Name - Happy path) has 3 distinct data variables (name). Thus, this test would be manually executed three times (each time with a different name).

PRE-STEPS	<ol style="list-style-type: none"><li>1. Access the website</li><li>2. Sign up</li><li>3. Go to the Individual Details form</li></ol>
-----------	---

## FIRST NAME

ID	TITLE	STEPS	DATA
